**CIDR:** default 0.0.0.0/0 là cho toàn b các range

## Khi to Security Group

to mt Security Groups m, thì chn Tab **Security Groups**, chn **Create Security Groups**.

### CREATE SECURITY GROUP

**Name**

**Description**

**Description:**

Security groups are sets of IP filter rules that are applied to the network settings for the VM. After the security group is created, you can add rules to the security group.
