

To Container và chn storage class

Bc 1: Nhấn vào **project ID** trong **My storage** của project

Region: HCM01

User overview

User name: demoiaas@vng.com.vn
Status: Active

Projects

	Project ID	Project name	Total quota	Period	Remain day
<input type="checkbox"/>	7fe8035b003f48fbb10ef298f332828d	vStorage_NhienTB	30 GB	From 12/02/2020	N/A
<input type="checkbox"/>	79950a5fd954cea9e37c9bb151c64b9	testvinht8	150 GB	From 10/02/2020	N/A

Bc 2: Chọn **Create container** để tạo container

Home / My storage

Create container

Containers

Name	Total objects	Access	Created date	Last modified
Thumbnail_Containers	2	Public	12/02/2020 13:31	12/02/2020 13:31

Bc 3: Chọn tên cho Container, chọn storage class cho container. Nhấn **Add** để tiếp tục

Create new container

We strongly recommend that name of container should contain lowercase letters and digits without specific characters such as #, @, \$, %, ?, /, \, ~ ... If you actually need to put a name with upper specific characters, please be aware that, it maybe have some problems when working with client tools supported from other vendors.

Container name:

Storage class:
Gold
Archive

Bc 4: Container mới sẽ hiển thị ra như hình dưới.

Create container

Containers

Name	Total objects	Access	Created date	Last modified
