

Hướng dẫn cách upload Object

Upload 1 object gồm 2 bước

1. Chọn container hoặc folder để upload
2. Upload 1 object bất kỳ

Thông tin do khách hàng upload thực sự thuộc về khách hàng, VNG Cloud sẽ không thể can thiệp hay khôi phục khi bị xóa / ghi đè bất kỳ lúc nào, vì vậy tránh các tác vụ xóa nhầm chúng tôi khuyến khích khách hàng nên enable tính năng Versioning cho dữ liệu.

Bước 1: Chọn container hoặc folder để upload

Chọn container để upload

The screenshot shows the VNG Cloud interface. At the top, there are buttons for 'Create container', 'Upload', 'ACL', 'Enable versioning', and 'Lifecycle'. The 'Containers' table lists 'Thumbnail_Containers' with 2 total objects and Public access. The 'Container information' panel on the right shows details for 'Thumbnail_Containers', including its name, total objects (2), access (Public), created date (12/02/2020 13:31), last modified date (12/02/2020 13:31), and a link to the container.

Upload vào folder, Nhấn vào folder

The screenshot shows the VNG Cloud interface for the 'Thumbnail_Containers' folder. At the top, there are buttons for 'Create directory' and 'Upload'. The folder 'Thumbnail_Containers' is selected, and the 'TestUpload' object is visible in the table below. The table has columns for Name, Storage class, Size, and Last modified.

Chọn upload
